FARMER'S COLUMN

By R. J. Milligan

Last week I wrote about soil conservation and that naturally leads to soil reclamation. It was understood that by cutting our heavy straw or trash it could be worked into the soil more readily than before.

Some of our soils are getting more difficult to work and maintain. Several reasons result in this condition. An example would be depletion of soil humus. As the humus becomes depleted the soil bakes or hardens thus reducing percolation of falling moisture or melting snow. It is realized by many farmers that a good substantial trash cover prevents run off and if your soil has lost much of its humus the trash helps to hold the moisture and allow a greater absorption.

How can we build up our soils? Several methods are at our disposal. The best where conditions permit are forage crops. In the drier parts crested wheat grass does well, even to resist in choking out weeds. Where a straight grass mixture is used for pasture, hay or for plowing down, an application when needed of 2-4 D helps to control weeds. Brome grass is a shallow rooted grass that does not add much fibre to the soil although it does give a very palatable hay. Grasses should be mixed for variety and nourishment of stock. The crested wheat grass and creeping red fescue add the most fibre to greater depths but brome is required for palatability. If not too dry, alfalfa should be added to the mixture. It adds nitrogen to the soil if the seed has been treated with nitrofixing bacteria. When the roots die after plowing drainage is provided. The legumes such as alfalfa, alsike clover and sweet

clover should be grown extensively on irrigated rotations. Authorities recommend sweet clover on land that is troubled with seepage or alkali.

An example of subsurface drainage was expressed at our meeting in Calgary recently. A farmer in the Olds-Red Deer area harvested his crop when no one else could get on their land. This piece of land had been seeded to forage for several years before being plowed and then seeded last spring. As the roots of the forage plants decomposed they provided drainage and the decomposing roots of the grasses added abundant fibre and humus, making the soil friable and tillage easier. The above is a practical example of an unusual benefit to be derived from rotations with forage crops.

I strongly recommend the use of a 11-48 fertilizer early in the spring on all forage fields. This way the fertility of the soil is built up in addition to fibre and humus being added.

There are many other examples of soil reclamation that can be discussed. A few would be contour farming, seeding down our drainage ditches and rotations. I know very few of our large grain farmers would take kindly to contour farming therefore it behooves all of them to prevent water erosion which if left unchecked will gully our farm lands to the point where contouring must be done.

BANG'S DISEASE

Have you completed your application for Bang's vaccination? This work is done in November, therefore get your applications in at once. Only heifer calves between four and eight months of age are eligible.

Province to Enforce 50 MPH Speed Limit

Designed to curb excessive speeds on Alberta highways, a new regulation which will establish a minimum of 50 miles per hour will be brought into operation this month, according to information received by officials of the Alberta Motor Association.

The provincial government is preparing to issue a definite regulation to this effect with the hope that it can be enforced by November 15th or as soon as possible after that date.

As soon as the regulation is proclaimed it will become part of the provincial highway traffic regulations and the RCMP will be instructed accordingly.

Earlier this year the province announced that the 50 mile per hour speed limit would be imposed but there was no legal authority to back up the police in taking this action. Now they will have the necessary authority to enforce the limitation.

The extension of hard surfacing in the province is believed to be a factor in excessive speeds in some cases and resultant highway accidents. While roads have been improved, the authorities say there is no excuse for reckless driving or speeding.

After years of controlled cat-in-the-hat English visitors have to become accustomed to our varied fare.

UNCLE HY SAYS

Briggs called the real estate man in, and said go sell my place, for that is not the case, this property I've had for long, somehow it doesn't fit, and so I think it best to sell. I'm getting tired of it.

And then one night the agent came and brought with him the ad, it is quite truthful, sir, he said. I think it reads not bad, and then he read what he had wrote, and Briggs said well, I vow, I think you better read again, there's something wrong somehow.

And so the ad was read again and Briggs said now that's fine, I've been looking for just such a place, I've been looking for some time, but this is what is puzzling me, I must be blind and dumb to think I had what I would have, right here beneath my thumb.

Manslaughter Charge Laid Against Moodie

A preliminary hearing into the charge of manslaughter against George Edward Moodie was ordered when Moodie appeared in police court Monday. The charge arose out of the death last week of Anthony Lesson, who is said to have died of injuries received when he was struck by Moodie during an altercation.

On Friday a coroner's jury enquiring into Lesson's death declared that he died "from injuries received in a brawl with Moodie."

The manslaughter charge was laid as a result of the verdict. Crown Counsel M. H. Staples, asked for a remand for the preliminary hearing. A previously laid charge of assault causing bodily harm was allowed to stand and the \$5,000 bail set in connection with it will cover the more serious charge.

According to police reports, Moodie and Lesson were returning from a house party on the morning of October 26. An argument developed as they walked along the street and blows were exchanged. Lesson fell back on the sidewalk, sustaining head injuries. He was taken to hospital where he died a week later.

Letter to the Editor

Dear Sir:

November 11, Remembrance Day—or is it Remembrance Day?

I have been in this village for two years and I have been very much surprised at the lack of interest shown in Remembrance Day both years. There was not even a flag to be found to fly to honor the memory of our boys, who died for you, the people of Carbon. It seems that they are gone and forgotten too!

F. Schmieder.

Through some freak, Montreal firemen and Jacksonville, Florida, police often get their respective radio telephone conversations mixed, and now the Jacksonville cops humorously give the French "a vous" instead of "over" as a "to you" signal.

Truck Hits Train Injuring Driver

Vyrland Moorehouse, Calgary sustained possible fractured ribs, head cuts and abrasions to both legs when the gravel truck he was driving collided with a westbound C.P.R. train at the level crossing at Carseland shortly before 10:00 a.m. Sunday.

Moorehouse was said to be travelling north when the accident occurred. The highway runs parallel to the railroad tracks and makes a sharp turn to the north at the level crossing. Moorehouse apparently applied his brakes when he saw the train but skidded into it.

He was taken to Holy Cross hospital by Starr's ambulance.

Moorehouse, employed by the Standard Gravel and Surfacing Co., was returning from a gravel pit south of Carseland.

The truck was almost completely destroyed by the smash up.

Bazaar

The senior group of the Carbon United Church Ladies' Aid will hold their annual bazaar on Saturday, Nov. 22. All adherents to this church are requested to co-operate with the Ladies' Aid and make this bazaar one of the finest.

NOTICE

I will be absent for a short time and anyone wishing to use the pound kept at my place should get in touch with Hugh Isaac.

R. Garrett.

CARD OF THANKS

Mr. and Mrs. T. Cardwell wish to thank their many friends of the Grainger and Carbon districts for the many kindnesses of the past and good wishes for the future upon the occasion of their leaving the district.

December Survey

Day after day Canadian farmers are making use of information supplied by Dominion and provincial departments of agriculture, universities, experimental stations and other services. Within the next two or three weeks the farmers of Canada will themselves have an opportunity to provide information.

The December live stock and poultry survey conducted by the Dominion bureau of statistics will soon be under way. Thousands of farmers across Canada will receive forms with requests for information. The world food and agriculture organization depends upon the bureau to supply up to date information on Canada's agricultural industry. The bureau in turn is depending on your co-operation.

Survey forms will be mailed around the last week in November. Your co-operation in completing and returning your form promptly will be appreciated.

OFF THE RECORD

Many people are wondering why Communists are looking for trouble when they claim that they don't want it!

Did You Pay Income Tax For 1942?

If so, read this carefully!

The Government of Canada will repay the REFUNDABLE SAVINGS PORTION of 1942 Income Tax by March 31st, 1948. If you are one of those who have refundable savings a cheque will be mailed to you BUT—

Your correct present address is essential!

Correct addresses are available for most of those entitled to repayment, but a large number of taxpayers are constantly moving and others marry and their names change.

Cards on which to report changes of address or name are being sent to all householders in Canada. These are being distributed at the present time. Additional cards are available either at your district Income Tax office or your local Post Office. Do nothing if you live at the same address and have the same name as in 1942.

If you are entitled to Refundable Savings on 1942 Income Tax and you have changed your address or name COMPLETE AND MAIL YOUR CARD AT ONCE!

Migration Within The Empire

IMMIGRATION HAS BEEN A MATTER of foremost interest since the war ended and nations commenced to reorganize their industrial and social life on a peacetime basis. The restlessness and uncertainty of life during the war led many people in Europe and the United Kingdom to consider starting new homes on this continent or in other parts of what used to be called "the new world". Lack of shipping space has so far prevented any large-scale immigration plan, but considerable attention has been given to the subject, and a great many diversified opinions have been expressed. When there are once more normal facilities for ocean travel and extensive movement of people from one part of the world to another can be arranged, we shall likely see a considerable flow of immigration, but at present there is little prospect of many of the plans which are being suggested being carried out for some time.

More Wanted In Australia

Because of the relatively small population of Canada, in proportion to the area of the country, we are deeply interested in any discussions concerned with immigration. The Honorable A. A. Calwell, Australian Minister of Immigration and Information, was a recent visitor in this country, and he expressed the opinion that migration from the United Kingdom to the Dominions is essential to the security of the British Commonwealth. "We in Australia have a population of 7,500,000 now, and we want to raise it to 20,000,000 in two and a half generations," Mr. Calwell stated. "We have to do this if Australia is to continue to be a citadel of European culture and civilization in the South Pacific," he continued.

Suggests Move From Britain

Mr. Calwell further stated that, in his opinion, Britain now has ten to fifteen million more people than she can feed, even in peacetime, and he suggested that it would be logical for these people to migrate to the Dominions. More than 400,000 people in the United Kingdom, he said, had registered to go to Australia. While it is apparent that at present Britain is having difficulty in feeding her population, this is known to be because of the economic crisis now facing the country. It is also known that there is a critical labor shortage in Britain and that, while some British people are migrating to Canada and Australia, people are being brought from Europe to help to meet the demands for workers in the United Kingdom. It is therefore apparent that the government would strongly oppose any scheme of migration on the scale suggested by Mr. Calwell. It would be desirable, indeed, to build up the populations of Canada and Australia with people from Britain, but it is certain that any plan for migration on the scale proposed by Mr. Calwell, will have to wait until the labor situation in Britain has greatly improved.

"Ah-h-h! I Can Breathe Again!"

If your nose sometimes fills up with stuffy transient congestion—put a few drops of Va-tro-nol in each nostril. It quickly reduces congestion and makes breathing easier in a hurry. . . gives grand relief from sniffling, sneezing, stuffy distress of head colds. Follow directions in the package.

VICKS VA-TRO-NOL

Fishermen Capture 1,000-Pound Turtle

CLARK'S HARBOR, N.S. — A 1,000-pound turtle was harpooned, hog-tied after a one-hour battle, and towed into port by three fishermen in a small boat here.

When harpooned the monster at first took the boat in tow, and only when it surfaced were the men, Claremont and Delma Jones and Wilfred Rennahan, able to throw a rope around and later shoot it.

Since they were unable to haul it into the craft, they towed it to port.

OIL SEARCH FOCUSED NEAR NEEPAWA AREA

WINNIPEG. — Excited by the results of the current developments in Alberta, Manitobans, and particularly the farmers in this province, are displaying unusual interest in the new extensive exploration for oil in the western prairie country of this province. The search, now in progress, is the most thorough and scientific which Manitoba has seen in the 40 years, on and off, during which oil has been sought in this region.

About a dozen reservations have been applied for by oil companies and individuals, involving in all about 1,500,000 acres. What has chiefly aroused the interest of Manitobans, however, is the big American oil companies which are in the vanguard of the hunt. The California Standard Co., a subsidiary of the Standard Oil of California, for example, now has a seismograph party operating east of Brandon, and is also conducting a geological survey of that area. The Gulf Co. of Tulsa, Oklahoma, also has crews conducting magnetometric surveys in western Manitoba.

Drilling operations are to begin shortly on a reservation near Neepawa. The reason the Neepawa area came into the oil picture is that during the last war period it was observed that magnetic instruments of war went dead just east of the town. Winnipeg financial houses with knowledge of "magnetometric anomalies" in producing Alberta fields heard of this and they organized the Langford Oil Syndicate. Its activities in core drilling will be watched with interest during the next few months.

The first recorded drillings in the Neepawa district was in 1908. It was then ascertained that the substrata within the town limits contained salt. Today that deposit is producing 100 tons of salt every 24 hours.

KEEPING PIPELINE

The main underground installation of Pluto—the undersea pipeline that maintained a non-stop flow of fuel from base to frontline units during the war—is to remain part of Britain's national defence system.

FUNNY And OTHERWISE

"I hope you enjoyed your game with the major," said the hostess to one of her guests. "He's very clever at cards, isn't he?"

"He certainly is," replied the guest. "He started by telling my fortune, and now he's counting it."

Visitor (to principal of business training college): You seem very busy in this establishment.

Principal: Oh, yes, we are busy.

Visitor: Suppose you give your girl students a thorough training?

Principal: Certainly. Why 60 per cent. of them marry their employers the first year.

Teacher (during written English test)—Write a sentence with the word "analysis" in it.

Pupil's Exam Paper—The teacher told us to look up the word "analysis" in the dictionary.

Mrs. Brown: "Anything in the paper, Henry?"

Mr. Brown (stifling a yawn): "Nothing striking."

Mrs. Brown: "Well, that's the best bit of news I've heard for a long time."

"Yes," said his proud mother. "John is such a good boy, and fond of dumb animals. Why only last night I heard him say in his sleep 'Feed the kitty, feed the kitty.'"

Bobby—Ma, what was the name of the last station?

Mother—Don't bother me, I don't know. Don't you see I'm reading?

Bobby—Gosh, that's too bad you don't know, cause little brother got off there.

His secretary was just comfortably esconced on his lap when the boss looked up and saw his wife entering the office. "Mile High Furniture Company," he dictated rapidly. "Gentlemen: Shortages or no shortages, how long do you think I can run my office with only one chair?"

Fan (arriving late)—"What's the score?"

Friend—"Nothing to nothing."

Fan—"Good game?"

Friend—"Don't know. It hasn't started yet."

Teentime Date Dress

Make your First-Date Dress a BIG success! Make Pattern 4501—this dreamy two-piece with the gay scallops and flirty peplum, bow at back and swish skirt! It's super!

This pattern, easy to use, simple to sew, is tested for fit. Includes complete illustrated instructions.

Pattern 4501 comes in teen-age sizes 10, 12, 14, 16. Size 12 takes 2½ yards 39-inch fabric.

Send twenty-five cents (25c) in coins (stamps cannot be accepted) for this pattern. Write plainly—Size, Name, Address and Style Number and send orders to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg, Man.

The halibut has both eyes on the right side of the head.

Canada's Fire Damage Hits High Figure

408 Canadians Lost Their Lives Through This Hazard In 1946

We are a prodigal people. Without turning a hair the Canadian people are compelled to admit that, last year, fire destroyed property in Canada amounting to nearly 50 million dollars, or about 55 per cent. more than the losses five short years ago. And, in the short space of 12 months, in 1946, 408 Canadians lost their lives through fire. Here, in stark fact, were 408 tragedies in Canadian homes. Yet, year by year, we continue, seemingly unperturbed, along the path of destruction. Last year, for instance, out of 55,400 fires in the Dominion, 41,005, or nearly 80 per cent., were in residential properties. Through carelessness, or wanton disregard of sensible precautions, fire destroyed, wholly, or in part, residential properties alone equivalent to what one would find in a city of about 200,000 people. And this at a time of a serious shortage of houses for all classes of people in Canada. Is there a remedy?

Organizations spend time and money preaching the gospel of fire prevention and illustrate how carelessness can destroy human lives and property. Regional insurance underwriters' associations of Board companies throughout Canada maintain rigid inspection services which undoubtedly help to prevent many fires. They also impress on the public that insurance rates are related to losses. Yet our fire losses continue to increase at an alarming rate—1946 figures alone, were nearly 12 per cent. higher than in 1945. The remedy, and there is one, lies in our own hands. We simply must pay more attention to simple rules established for our own protection. In other words, day by day, we must all exercise more care. We must stop playing with fire to prevent fire if we want to eliminate this national disgrace from Canadian yearly records. A little more common sense and a little less prodigality will save lives and property.

Hunter! Make Sure It's A Deer

There are always people who should never be permitted to handle firearms—and a lot of them seem to be hunting enthusiasts. Some of them are criminally careless. They blaze away at every sound and shadow, not bothering to find out what they are aiming at before they pull the trigger. Then there are others who are temperamentally unsuited. They get tense, nervous, carried away with excitement. Their imagination plays tricks on them—makes a man look like a deer or a bear or a partridge or a rabbit or a duck.

When we say this, we are not exaggerating, but simply recalling the sworn testimony given at inquests in this province by men who have killed other men. It is all there in the records of coroners' courts. "I thought he was a deer." "I saw something moving behind the leaves, and I thought it was a bear."

In one case the father of three children was taken for a partridge. It was stupid, but not funny, and nobody could have expected the widow to say graciously, "it's all right—we all make mistakes."—St. John Telegraph-Journal.

SELECTED RECIPES

GLAZED HAM LOAF

2 pounds ground smoked ham
1 pound ground fresh ham
¾ to 1 cup coarse bread crumbs
1 egg, slightly beaten
¾ cup milk
½ teaspoon pepper
½ teaspoon prepared mustard
1 tablespoon vinegar
2 teaspoons soft butter
¼ cup brown sugar, firmly packed
Whole cloves

Combine ham, bread crumbs, egg, milk, and seasonings and mix well. Line 9x5x3-inch loaf pan with waxed paper and pack mixture firmly into pan. Unmold loaf onto shallow pan and remove paper.

Mix butter and brown sugar together. Spread over loaf. Insert whole cloves.
Bake in moderate oven (375 deg. F.) 1 hour, or until done. Makes 6 to 8 servings.

Chopsticks are used by some Chinese for signaling secret codes across a room.

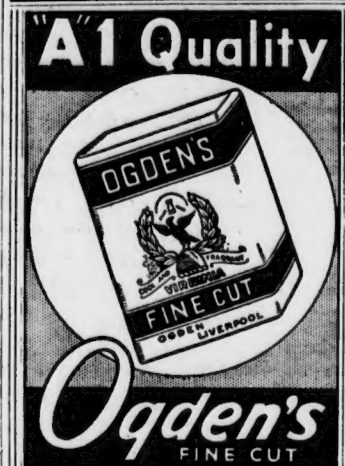

Freak Developments In Nagasaki Crops Reported

TOKYO.—Summer crops in atom-bombed Nagasaki, some with freak developments, have shown increases of from 50 to 300 per cent. over the normal yield, Takeo Furuno, Nagasaki agricultural expert, told Kyodo News Agency.

He said increased output was noted in all food plants except dry rice and lentils, which had not matured.

The wheat crop, Furuno said, was about twice normal and the cotton crop three times the average. Sweet potatoes planted at the end of May were ready for harvesting at the end of July.

Pumpkins, sugar beets, tomatoes, eggplants and similar produce showed a 50-per cent. increase over previous production. The skin of some pumpkins, he said, developed into a leaf and then a bud and finally became a second pumpkin.

Relieve Misery of HEAD AND CHEST COLDS while children sleep

When colds strike, rub throat, chest and, back at night with THERMOGENE MEDICATED RUB. Health LEAGUE of CANADA presents TOPICS of VITAL INTEREST

DIPHTHERIA AND WHOOPING COUGH DECLINE

The situation in Canada in 1946 in regard to diphtheria and whooping cough showed marked improvement in comparison with the previous year. Provisional figures issued by the Dominion Bureau of Statistics reveal there were less cases of and fewer deaths from these two diseases last year.

The whooping cough situation, in particular, showed marked improvement, with more than a 50 per cent. reduction in fatalities recorded. In 1945 there were 12,192 cases with 457 deaths, against 7,671 cases and only 226 deaths in 1946. Improvement in the diphtheria picture was not as spectacular. In 1946 there were 2,535 cases and 229 deaths, against the 1945 figures of 2,786 cases and 270 deaths.

At that, however, diphtheria and whooping cough each caused more fatalities than dread poliomyelitis which in 1946 was in epidemic stage. There were 2,527 cases of polio with 177 deaths. In 1945 there were only 384 cases of polio and 24 deaths.

Increased use of diphtheria toxoid and whooping cough vaccine is reflected in the lowered case and death rates. These two preventive agents can wipe out diphtheria and whooping cough just as vaccination has eliminated smallpox.

However, until both diphtheria and whooping cough have been wiped out as menaces to the health and lives of children, there still will be need of intense immunization campaigns. That is why there is continued need for such annual observances as "National Immunization Week" which is sponsored throughout Canada by the Health League of Canada in co-operation with health departments.

The Health League requests that parents or guardians of children who have not been immunized against diphtheria and whooping cough—and smallpox, too—consult their health departments or their family physician at once.

MILLIONS FOR NEW CARS

OTTAWA. — Canadian motorists paid a record \$193 million for new vehicles last year, the Dominion Bureau of Statistics reported. While the 120,000 passenger and commercial vehicles sold in 1946 was still under the record 1937 total of 144,000, their purchase price was more than \$47 million above the 1937 total.

26,522 IMMIGRANTS

OTTAWA.—A total of 26,522 immigrants came to Canada during the seven months ended last July 31, according to figures released by the immigration branch. Most of the immigrants were from the British Isles.

HISTORIC FLAG

The white flag which signalled the German surrender of Boulogne to Canadian troops in 1944 was handed to the city's mayor recently at a ceremony attended by Canadian naval, army and air force representatives.

HARRIES HARDWARE

WORLD OF WHEAT

The price of registered seed in the three prairie provinces once again has been increased.

The reason for the increase is that an extraordinary demand has suddenly sprung up this year from European countries for Canadian registered and certified seed wheat. Many who are in the exporting business are bidding quite high prices for this seed. The prices set by seed growers are in accordance with the offers they have had from these exporting concerns. The possibility is that so much seed will be exported that the normal use of prairie farmers to improve their crops.

Those who are unable to purchase seed should, I suggest, find out the name of their nearest neighbor whose seed was tested in crop testing plan plots this last summer and whose samples were given an A grade, which is equal to certified or registered. If such farmers still have left in their bins wheat that corresponds with this sample, this would be a good source of supply and at a reasonable price for those other farmers who cannot purchase sufficient registered or certified seed sealed in the sack. Obviously seed cannot be exported out of Canada and still be available to prairie farmers at the same time.

Courage

Courage is the consciousness of power, the realization that emergencies can be met, obstacles overcome. As long as we do not become suspicious of our own ability we are courageous.

Mr. and Mrs. R. Garrett left on Wednesday for Victoria where they will spend the winter.

Mr. R. Gimbel of La.ombe was a recent visitor at the home of his brother Dick, and Mrs. Gimbel.

Mrs. W. Poole is visiting at the Coast.

Mr. and Mrs. Leo Trepanier of Gull Lake, Sask., spent the past week in Carbon.

Honoring Mrs. Doug Pallesen (nee Florence Downe), Mrs. A. McLeod entertained a number of ladies at a shower on Thursday evening last. On Wednesday evening of this week Mrs. Ben Fox and Mrs. Ernest Fox entertained at a shower in honor of Florence at the home of Mr. and Mrs. J. Adams. The honored guests received many useful and ornamental gifts at these two events.

Doug Prowse and Miss Mary Sommerville were married at Three Hills on Tuesday. They will reside in Carbon.

Johnny Craddock has purchased the trucking business formerly operated by Findaly Code. Johnny has also purchased the house recently vacated by Mr. and Mrs. Norman Nash and has moved into town.

Memorial service was held in the Park on Tuesday and a wreath laid on the Cenotaph by Legion members.

Don't forget old timers night Wednesday, Nov. 19. See posters for full information.

Mrs. C. Cressman is visiting in the States.

Miss Shirley Brown, who is attending Monut Royal College in Calgary, was home for the holiday.

Honoring Miss Cesia Jurkiewicz, a bride elect of the month Mrs. W. White and Mrs. F. Sherring entertained a number of ladies at a miscellaneous shower at the home of Mrs. Sherring Wednesday.

Two License Plates For Cars Next Year

When more than 100,000 Alberta motorists obtain their license plates next year they will receive front and rear plates. This is the information received by the AMA from the provincial secretary's department.

Thus after a lapse of several years Alberta returns to the pre-war system and the issuance of double steel plates.

Police have claimed for some time that the enforcement of traffic regulations was made more difficult through the use of the single plate. This plate became necessary in various provinces and states through the shortage of steel.

The Alberta plate color for 1948 will be black lettering on an aluminum background. For the first time the Alberta colors will be the same as those of the sister province Saskatchewan. It is stated that a shortage of pigment for certain colors has brought about similar color in the Alberta and Saskatchewan plates for 1948.

A Poser for Boozers

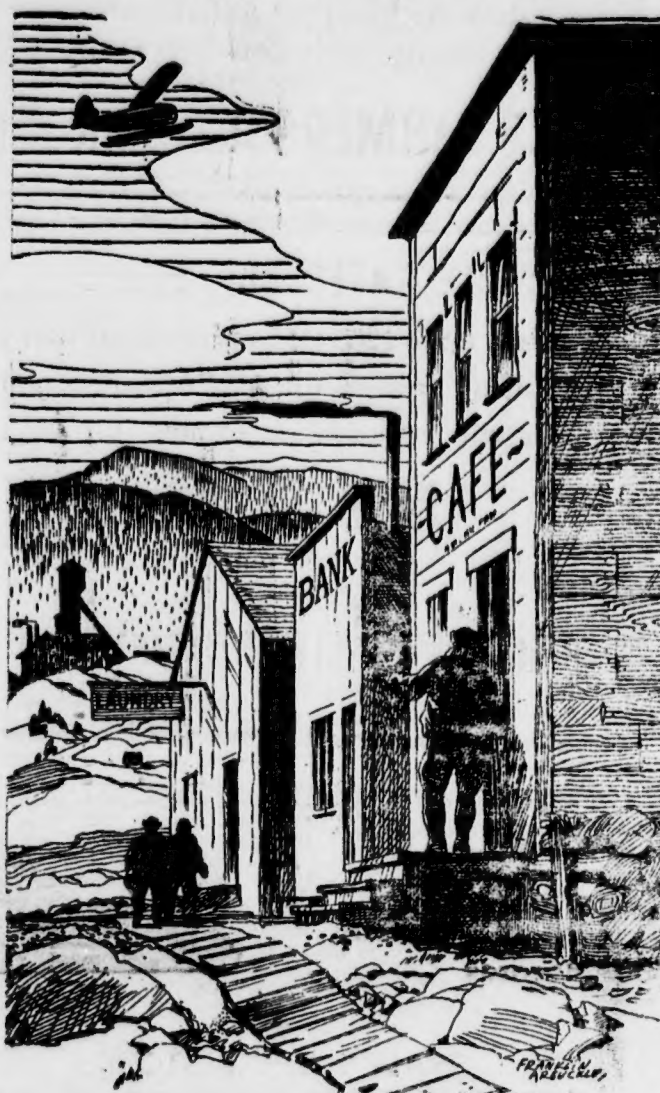

If you are a married man who absolutely must drink booze, start a saloon in your own home. Be the only customer and you won't have to buy a license. Give your wife two dollars to buy a gallon of whisky. Remember there are 69 glasses in a gallon. Buy your drinks from your wife.

When the first gallon is gone your wife will have eight dollars to deposit in the bank and two dollars to start business again.

If you should live ten years continue to buy booze from her and then die with snakes in your boots. Your widow will have enough money to bury you respectably, bring up your kids buy a house and lot, marry a decent man and forget all about you.

O valiant Hearts, who to your glory came
Through dust of conflict and through battle flame,
Tranquil you lie, your knightly virtue proved,
Your memory hallowed in the Land you loved!

Sir John S. Arkwright

a cafe...

a Bank

THE VEIN proves rich, a shaft is sunk, and a new mining town springs into life. The main street takes form. Commercial buildings rise.

When such a development occurs, the services of a bank are needed — to handle payrolls, to keep savings accounts and, as the town grows, to furnish bank credit for the needs of the community.

This is a basic pattern in Canada's development. And part of it is the local bank manager, providing those financial services which help Canadian men and women to win the rewards of modern enterprise and modern living.

YOU HAVE TO BE TALL—Tallest people in Hamilton, Ont., are forming a Tip Toppers club. To become a member, girls will have to measure up to the five feet, 11 inches of Kay Arklie, organizer of the club, shown here. Men must be six feet, two inches without their shoes.

ILL-FATED SHIP MILVERTON SETTLES IN ST. LAWRENCE RIVER—Freighter Milverton is shown as she slowly but surely crumbled to pieces on a shoal in the St. Lawrence river after her recent collision with the tanker Translake. Swept by fire and explosion, she has balanced precariously on a rocky ledge ever since the accident which claimed the lives of nine of her crew.

BEST MAN—Cousin of the King, the Marquis of Milford Haven is to be best man at the wedding of Princess Elizabeth and Lieut. Philip Mountbatten on Nov. 20.

LIKE A CHESHIRE, IN FACT, IT IS—A picture of feline jubilation is "Fuzzy", kitten owned by Tom Kenney of Baltimore, as he (maybe it's she) was acclaimed as the "cutest kitten in the show" at the pet show sponsored in Baltimore. If you look at "Fuzzy's" grin long enough, you'll be surprised to find yourself grinning—like a Cheshire cat.

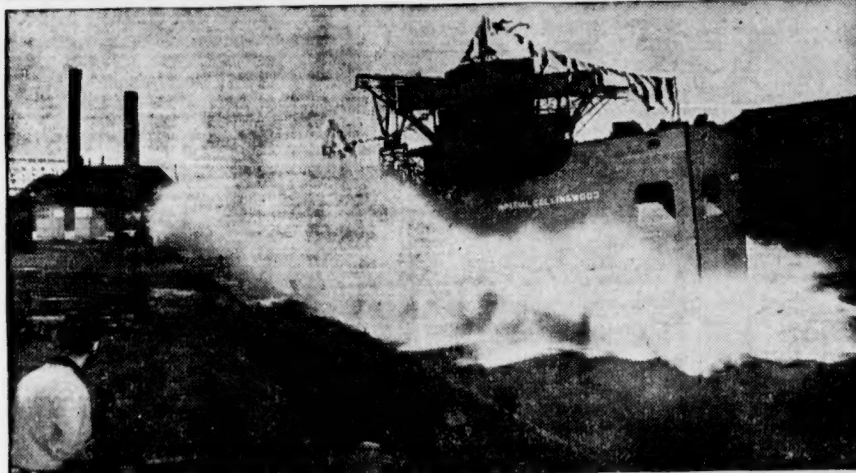

NEGRESS REFUSED ENTRY TO NURSES' SCHOOL—Marissa Scott, shown centre with two nieces, has been refused admittance to a nurses' training course in Owen Sound, Ont., presumably because she is a Negress. Hon. Russell T. Kelley, Ontario minister of health, said there was nothing he could do about it when approached by Ed. Sargent, boy mayor of Owen Sound. Marissa may train in Windsor.

LIKES "MAIL ORDER" MARRIAGE SYSTEM—Bill Keralas, chef of a Guelph, Ont., restaurant has a "mail order" fiancée and he recommends the system to any one who wishes to try it. Shown with him is Diamond Andonopoulis, who arrived in Canada from Greece recently after a mail engagement for 18 months. Their marriage was arranged by their relatives and hastened when guerrillas occupied her native town and she sent a call to her fiancée for help. Bill then arranged air transportation to Canada.

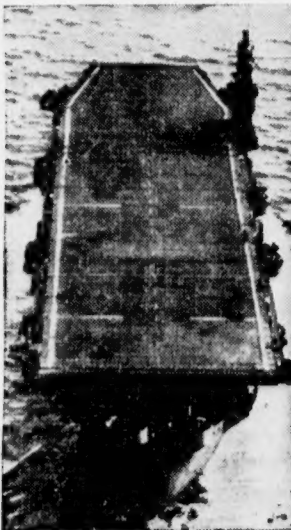

HELICOPTER MELODRAMA—Runaway ride in a horse and buggy to the edge of a steep ocean cliff gave Jane Wyman, shown here, and Lew Ayres a real scare, but they were unhurt. Team was frightened by helicopter hovering overhead and shooting film for forthcoming movie.

GREAT LAKES' SHIPS LAUNCHED IN COLLINGWOOD—First of three lake tankers being built at Collingwood, the Imperial Collingwood is shown as she took to the water in a perfect launching. The tanker is a canal-sized boat with a deadweight tonnage of 2,500 tons. Three will cost some \$3,200,000.

TRANSPORT HELICOPTER IN TRIAL RUN—With its overhead propellers whirling at both ends, the U.S. navy's new HRP-1 helicopter hovers over the ground in a trial run. Recently delivered to the Navy Air Test Centre at Patuxent, Md., the double-rotored craft is powered by a 600-horsepower engine which enables it to attain speeds well over 100 miles an hour and to ascend vertically with more than a ton of freight. Twenty are on order.

NO FLAT-TOP—If the U.S. navy would allow you to retain the flight deck, this could be used for a sea-going football field or a couple of tennis courts. But if you buy this baby flat-top, the U.S.S. Sangamon, which is advertised for sale, you'll have to agree to get rid of the flight deck. The ship can be seen at Claremont, Va.

THROUGH A BLAZING HOOP—Daring rider puts his motorcycle through this flaming loop during recent police show at Hendon, England.

U.S. SUPPORTER—Carlos R. Romulo, the Philippine ambassador to the U.S. and permanent representative to the United Nations, is shown as he addressed the U.N.'s general assembly meeting at Flushing Meadows hall. Romulo spoke in support of the Marshall plan for the rehabilitation of Europe.

TWO DIE, THREE INJURED—Force of impact, when their car ran into a truck stopped on the highway near London, Ont., threw all five persons in the car into the front seat, shown here. Truck driver said he thought he had been struck by another truck, so great was the crash.

OUR COMPLETE SHORT STORY—

The Ten Dollar Bill

By MARGARET C. CORB

WHEN Sally Carter spied the crisp green of the bill lying against the white of the sidewalk that bordered the Engineering building, she dropped the handle of the baby carriage and swooped down upon it, turning her back, for the moment, on the ivy-covered brick and the great elms of the university campus.

Look, Richey, look!" she cried happily to the cheerful bright-eyed boy in the carriage. "A ten-dollar bill—a real, brand new ten-dollar bill. I found it myself, and I can spend it any way I please!"

Turning the carriage briskly to return the way she had come, Sally sped her son back toward the trailer camp that nestled at the foot of the hill, a haven for married student veterans enjoying the benefits of the GI Bill of Rights. With her red checked pinafore and her blond curls whipping around her in the early autumn sunlight, she seemed more the older sister with the care of a little brother for the day than a mother herself.

Once inside her trailer home she hurriedly hung the pinafore in the tiny clothes closet and reached for her best skirt and sweater. "Do you know what I'm going to do with this

money first thing, Richey?" she cried happily. "I'm going to get you a play pen, so you can stay out in the fresh air all day long and have plenty of room to wiggle around in. My goodness, I know a crib is no place to raise a boy like you, but we can't buy everything on the money they give Daddy to go to college—not 'til we pay off some of the debts we ran up before his allowance started, anyway."

Sally dropped the sweater to give the baby a quick, impetuous hug. "I just wish I could buy Daddy a nice quiet place where he could study all by himself," she exclaimed, "but anyway we'll get him that pipe he wants, and maybe there'll be enough money left over to get me some dress material!"

Flinging on the sweater and brushing out her blond curls, she hurried the baby into the carriage. Speeding joyfully across the campus toward town, her hand straying often to the money in her pocket, Sally suddenly slowed her pace, her face sober.

"Oh dear," she thought, "I've been so happy about having some money all my own that it hadn't even occurred to me that it belongs to someone else. Oh dear!" She struggled a moment with her well-trained conscience, then tossed her chin in the air and continued toward town, holding her mind to the thought of the pleasure the money would bring the three of them. She passed the Engineering building resolutely, turned down the hill past the library, and a moment later swung the carriage about and began to retrace her steps.

"Oh, Richey," she murmured sadly as she neared the spot where she had found the bill, "it was so nice just for a little while to have some money all my own, that wasn't marked for rent, or food, or the debt."

Parking the carriage at the door to the engineering building, she entered, hesitated a moment outside a door marked "Office," and went in. The secretary, an energetic, youthful greyhead, looked up as Sally laid the bill on the desk.

"I found this outside the building, Miss Hanson, so I guess it belongs to someone in here." She was talking fast, turning to leave.

"Wait a minute, Mrs. Carter," the older woman called as she reached the door. "You may as well keep it. I don't see how we can ever find out who it belongs to, as no one has reported a loss. 'Finders keepers,' you know. Now you just run along down town with it and see what you can buy," she finished gaily, her wise glance seeing the sudden happiness on Sally's face.

"Do her good to have some money all her own," Miss Hanson muttered as the door closed. "Of course I should have held it a day or two in case anyone asked about it, but that child probably hasn't had a dollar to spend as she likes since Richard entered here."

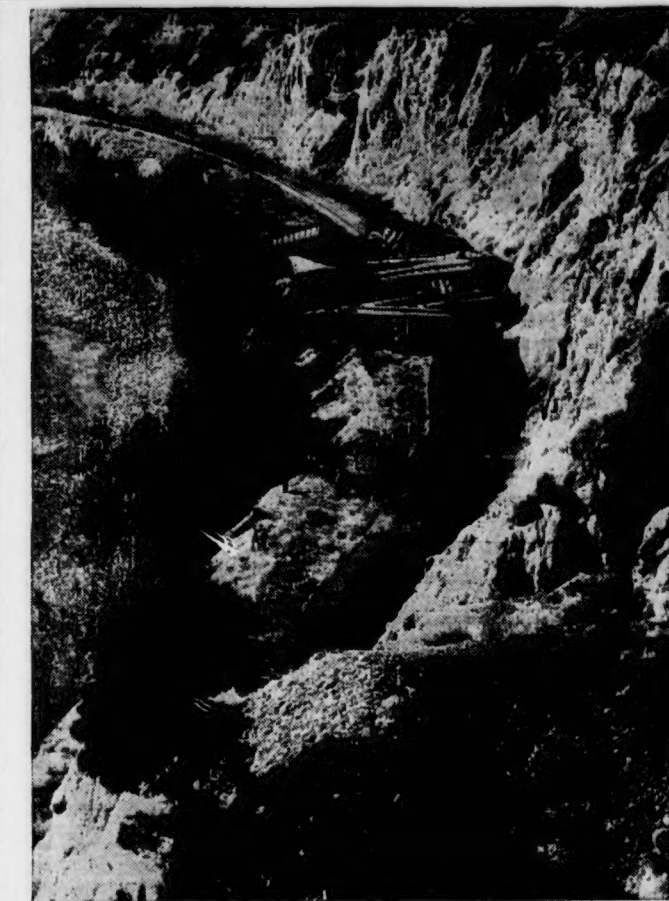

Outside, Sally was hugging Richey happily. "Miss Hanson said I should keep it," she told him, "and she ought to know. She's been working in there for years and years, Daddy says. Let's go down town!"

In mid-afternoon, about the time Sally was unwrapping her new purchases at home, Richard Carter was frantically going through his pockets in one of the laboratories in the Engineering building.

"I know I brought it with me," he muttered as he searched one pocket after another and turned to his billfold for the fourth time. "Good grief, what'll I do? It's all the money we had left for the rest of the month—a nice new ten-dollar bill. I must have dropped it when I opened my billfold sometime today."

He pulled his ear absently as he walked slowly from the room. "I'll go ask Miss Hanson if anyone has turned it in—I must have lost it around the building somewhere."

A moment later, as he was ex-

FIVE DIE IN B.C. TRAIN WRECK—Five persons died when the C.N.R. freight train rounded a curve 37 miles west of Kamloops, B.C., and ran into a rockslide. Among the victims were three Indian boys who had been playing hockey from the residential school in Kamloops. The locomotive and five carloads of new autos were destroyed and six other cars jumped the tracks, as shown in this general view of the wreck and rockslide. Fireman was badly scalded.

plaining his plight to the secretary, he was relieved to see a quick look of comprehension in her eyes. "You haven't had it turned in, have you?" he finished hopefully.

"Why yes," she replied slowly, "I have. At least, a young lady gave me a ten-dollar bill this morning and told me she'd found it outside. It must have been yours. Wait a minute, I put it in my pocketbook for safekeeping."

Reaching into a drawer in the desk, Miss Hanson pulled out a well-worn black bag. After a moment's search she found a bill, tucked away with several one-dollar ones, that was crisp and new and had the numeral "10" in its corners. "Here it is," she said, handing it over with a smile.

The boy took the money with a grateful grin. "Well thank goodness—we can eat for the rest of the month, anyway," he said as he left the office. "Thanks a million, Miss Hanson!"

"Nice old girl, Miss Hanson," Richard thought as he sped down the hill toward the trailer city.

To Increase Coal Production In B.C.

VICTORIA. — Canadian Collieries (Dunsmuir) Limited is completing plans to put into full-scale production a new mine at T'Sable River that is expected to double Vancouver Island's production and add \$3,500,000 a year to the value of its output, it was learned from reliable sources here.

Described as the most important coal mining development on the island in the last half-century, the 12-foot T'Sable River seam is regarded as the most promising ever uncovered here.

Experts who have made exhaustive tests and explorations estimate the seam is capable of producing 1,000 tons a day for the next 30 years. Total production from all mines on the island in July last month for which figures are available—was 36,436 long tons.

Long concerned over the steady decline in island coal production, provincial government officials say the T'Sable mine, when in full production, will rejuvenate the industry.

Woman Has Spent Three Years At Sea

NEW YORK.—A veteran of ocean crossing, completing her 145th trans-Atlantic voyage, arrived here on the Norwegian American Line steamship Stavangerfjord. She is Mrs. Mad-sella Hvostlef, 75 years old, of Baltimore. She estimated that she had spent three full years at sea.

Born in Norway, she made her first ocean voyage to the United States in 1880 and made her first return trip 15 years later.

Ice cream was invented in Italy in the 14th century. 2746

Tuberculosis Deaths Show Increase

Only Saskatchewan And Ontario Report A Fall In The 1946 Death Rate

OTTAWA. — Canada lost ground last year in the battle against tuberculosis, the Canadian Tuberculosis Association reported in announcing the necessity of intensifying its tuberculosis program across the Dominion.

Figures released by the Vital Statistics Branch of the Dominion Bureau of Statistics disclosed that 238 more Canadians died last year from the disease than in the previous year.

A total of 5,797 Canadians died of TB in 1946 and the TB death-rate has climbed from 45.9 per 100,000 of population, the 1945 all-time low, to 47.2.

Only Ontario and Saskatchewan have reported a fall in the 1946 death-rate, which was 25.4 in Ontario, and 26.6 in Saskatchewan. Quebec stood highest at 72.2. Other provinces: Alberta 37.1; Manitoba 44.6; British Columbia 57.7; New Brunswick 57.9; Prince Edward Island 58.5; Nova Scotia 61.9.

"There is some consolation in the fact that the 1946 death-rate is still below the average established during the war years, but it is regrettable that the rate should be going up instead of down," said Dr. G. J. Wherrett, C.T.A. executive secretary. "It is all the more disappointing because our neighbor across the line, the United States, is able to report an all-time low of 35.9 per 100,000 of population during 1946."

To Feel Right — Eat Right

Sale Of Registered Aberdeen Angus Cattle

The estate of the late James Turner, Carroll, Manitoba, twenty miles south of Brandon, will, on Saturday, October 25, at 1:00 p.m. standard time, disperse the registered herd of pure bred Aberdeen Angus cattle comprising about fifty head. These cattle are all the descendants of the famous Karama 2nd of Glencairn.

Writes With His Heart

Maybe it's because they live so close to their readers that small-town editors get to write more with their hearts than with their heads. Anyway, we think you'd go a long way before you'd run across a better soliloquy than this. It was written by Oscar Stitt, editor of the Radville (Sask.) Star, on his birthday anniversary: "As we grow older, and the shadows begin to lengthen, and the leaves which seemed so thick above our head in youth grow thin and show the sky beyond, and those in the front ranks drop away, and we come in sight, as we must, of the eternal rift-pits beyond, a man begins to feel that among the really precious things of life, more lasting and more substantial than many of those objects of ambition here, is the love of those he loves, and the friendship of those whose friendship he prizes."—Canadian Printer and Publisher.

The practice of shoeing horses was known in 300 B.C.

Neuritic? PAINS?

TAKE

Next time you feel those nasty twinges of neuritic pain, it's high time you tried Kruschen. The cause of some neuritic pains can often be traced to incomplete and sluggish elimination. In these cases Kruschen usually helps, because Kruschen's balanced blend of saline minerals bring about a complete and thorough (but gentle) elimination and at the same time supply minerals which are often deficient in the daily diet. Start with Kruschen today, and continue for a month or so by taking a small dose each morning in your coffee, tea or fruit juice. This plan should soon show happy results in the relief of neuritic pains and an improvement in your general health. At all Druggists: 25c and 75c.

Are You Set For Winter?

The wise motorist has had his car tuned up for winter driving. Are you taking as good care of the important engine for which you are responsible—your body?

These "human engines" of ours are infinitely more important than any car ever built and their smooth working depends largely on the knowledge of the homemaker. Miss Joyce Lewis, nutritionist for the home economics division of the Alberta department of agriculture explains it like this: The self starter, hunger sends us looking for fuel; the carburetor appetite, controls the mixture and the amount we eat; the organs of digestion prepare this fuel for the distributor, the blood stream, which carries it to the different parts of the body.

Not only the fuel, which provides our energy, but also the oil which regulates the engine, and the building and repair parts are provided by the food we eat. Our health and happiness, our ability to work, the length of our life, depends to a large extent on the food we provide for our "engine". Keep your body "tuned up" to help it avoid the "backfire" of rheumatism, colds, and other common winter ailments. Know what foods to eat for health. For information write to your district home economist or to the home economics service of the Alberta department of agriculture at Edmonton.

Polish Veterans Allowed to Purchase Their Own Farms

Polish veterans who came to Canada to work on farms last year are now permitted to purchase their own farms, it was announced by Hon. Humphrey McCall, minister of labor. They will also be permitted to rent farms which they intend to operate themselves.

This meets with the general plan for which the Polish Veterans were brought to Canada, to increase food production in the Dominion.

Nearly two thirds of the 2876 Polish veterans who came to Canada last November are still employed on the original farm to which they were assigned. It is felt that those veterans who have so fully co-operated should be given some freedom of choice of the farm on which they will be employed during the second year of their two-year contract. Where the Polish veteran has completed one year's employment with the same employer he may be allowed to make his own arrangements for employment in the second year with a farmer of his own choice.

Radar, which records the impressions of echoes, is not affected by fog, but rain limits its range.

Isn't It the Truth

A business may spread itself over the whole world and may employ a hundred thousand men but the average person will usually form his judgment of that business through his contact with one individual. If this person is rude or inefficient, it will take a lot of kindness and efficiency to overcome that bad impression.

Who Am I

I am the foundation of all prosperity. Everything that is of value in this world springs up from me. I am the salt that gives life its savor. I am the sole support of the poor. The rich who think they can live without me, live futile lives. I have made America. I have built her incomparable railroads, created her cities, and reared her skyscrapers. I am the friend of every worthy youth. If he makes my acquaintance when he is young and keeps me by his side all his life I can do more for him than the richest parent.

I can keep bodies lean and lithe, minds keen and alert. I am even the parent of genius itself. I am represented in every paper that flies from the press, in every loaf of bread that tapers from the oven.

Fools hate me; wise men love me. The man who shirks me and scorns my aid never really lives, even though he may continue to breathe. Who am I? My name is work.

Farmers Urged To Get Montcalm

Farmers wishing Montcalm barley for 1948 seed are urged to get their supplies as soon as possible.

This suggestion is made by the Barley Improvement Institute sponsored by the Brewing and Malting industries, presumably because it may be anticipated that unless Montcalm is obtained promptly there may be difficulties or inconveniences in getting adequate supplies later on. Farmers are asked to contact their nearest Montcalm grower, their local agricultural representative, or the field crop commissioner of their provincial department of agriculture.

The variety Montcalm is one of four eligible in the \$25,000 National Barley Contests of 1946 and 1947, also sponsored by the brewing and malting industries. It is now established as one of the best varieties of malting barley, equal if not superior to the well-known variety OAC 21. This year it has been giving highly satisfactory yields. Present prospects are that it may prove to be the best high quality malting barley.

This is another reason why farmers are being urged to get seed supplies for next year. Hitherto the variety hasn't been available in commercial quantities. A fair supply is available from the 1947 crop.

BERT PEARL is best known to radio listeners in Canada and the United States as pianist, singer and master of ceremonies of the Monday to Friday Happy Gang broadcast at 11.15 a.m. over the CBC TransCanada network. He has been with this program since it first went on the air 10 years ago.

Divide Your Dollar With Your Neighbor

Everybody has a certain amount of civic pride, that sort of pride which helps make a village a town, and a town a metropolitan city.

The growth of any community is dependent upon the support given its citizens. If you fail in your co-operation, your town either stands still or goes back.

If you uphold your town by sustaining it wholeheartedly, you help yourself and the community. Buy at home. Be neighborly with your dollar. Divide your dollars among your merchants and others who have the interests of CARBON at heart. Help them and they will help you to greater values, for increased volume means decreased costs.

CARBON needs your support and you need the support of the town. Let's get together and share our dollars for a mutual prosperity.
